

ONEMEAL PARTNERSHIP

ESWATINI ADVENTURES IN MISSIONS

COUNTRY CHALLENGES:

eSwatini (formerly Swaziland) has the world's highest infection rate of HIV at 28 percent –affecting over 360,000 of the 1.3 million Swazis in the country, and leaving 12% of the population as orphaned children. The nation recently experienced the worst drought in the last 100 years –during which, one in three Swazis have been facing food insecurity. With a life expectancy of 49 years and poor employment opportunities, eSwatini needs help to ensure the next generation can be effective leaders.

MORE THAN 1 OUT OF EVERY 9 CHILDREN IN ESWATINI IS AN ORPHAN

MORE ABOUT OUR PARTNER:

Adventures in Missions believes in God's redemptive plan for eSwatini. They know the key to a nation's future is its children — in the care for their physical well being, the fulfillment of basic needs like food, clean water, and shelter, and in their education. Their vision is to see a generation of children raised up to become well-adjusted adults living abundant lives through Christ and contributing in productive ways to their society through church, work, family, and community. AIM approaches this vision through village Carepoints where orphaned and at-risk children are lovingly served through food, discipleship, clean water, education, and healthcare.

OUR IMPACT THROUGH ONEMEAL

KATW partners with AIM by supplying meals and playgrounds to their community CarePoints. **Over 7,000 children attend 40 CarePoints each day.** They are provided with a nutritious meal and clean water, which they likely do not have access to at home. In addition to fundamental needs, CarePoints provide a safe place to learn and play, healthy adult role models, school scholarships, and access to music, sports, counseling, and other programming.

7,800 KIDS FED 40 CAREPOINTS

YOU ARE IMPACTING THOUSANDS OF KIDS FOR WHOM THIS IS LIKELY THEIR ONLY MEAL OF THE DAY, BUT IT'S ONE THAT WILL COMBAT THE EFFECTS OF HUNGER AND MALNUTRITION. NOTICEABLE DIFFERENCES HAVE OCCURRED IN THE HEALTH OF THESE CHILDREN SINCE THEY BEGAN TO REGULARLY ATTEND. ONCE THIS PHYSICAL NEED IS MET, CHILDREN CAN BUILD HEALTHY RELATIONSHIPS, HAVE ACCESS TO MENTORSHIP, PERFORM BETTER IN SCHOOL, AND REACH THEIR FULL POTENTIAL. IT ALL STARTS WITH FOOD.
