Food Warehouse

PANAMA

New Air Conditioning for Food Warehouse

Your gift will help install reliable air conditioning in our food storage warehouse. Essential for keeping food ingredients cool, dry, and safe from spoilage in Panama's humid climate. This ensures that every meal packed by volunteers in the states reaches the children. It's a simple but vital step to ensure every OneMeal pack remains fresh and safe.

Financial Need: ~~\$3,000~~

Thank you for your partnership in this transformative mission!

Completed Project Update

Our Panama warehouse currently has the capacity to store up to three containers, representing approximately 812,000 meals. The space accommodates 50–60 pallets, with additional room along the sides to store more donated goods, allowing us to continue expanding the reach of this blessing to more Hope Zones.

Given Panama's extreme climate, with average temperatures reaching 104°F (40°C), maintaining proper storage conditions is critical. For this reason, a reliable air conditioning system is essential to preserve the food at safe, low temperatures, protect it from humidity, and ensure the highest quality of the product for the children we serve.

Currently, the children being served in Panama represent lives being transformed daily through consistent access to food and care.

Because of your generosity, we are able to protect this mission and extend hope, care, and nourishment to those who need it most.

Together, we are making a lasting impact one child, one meal, and one community at a time.
